RFID IS A STRATEGIC ENABLER TO CONNECT TIRES TO A LARGER ECOSYSTEM AND BUILD DATA DRIVEN SERVICES

PASSIVE & AFFORDABLE

CAN BE READ THROUGHOUT LIFECYCLE

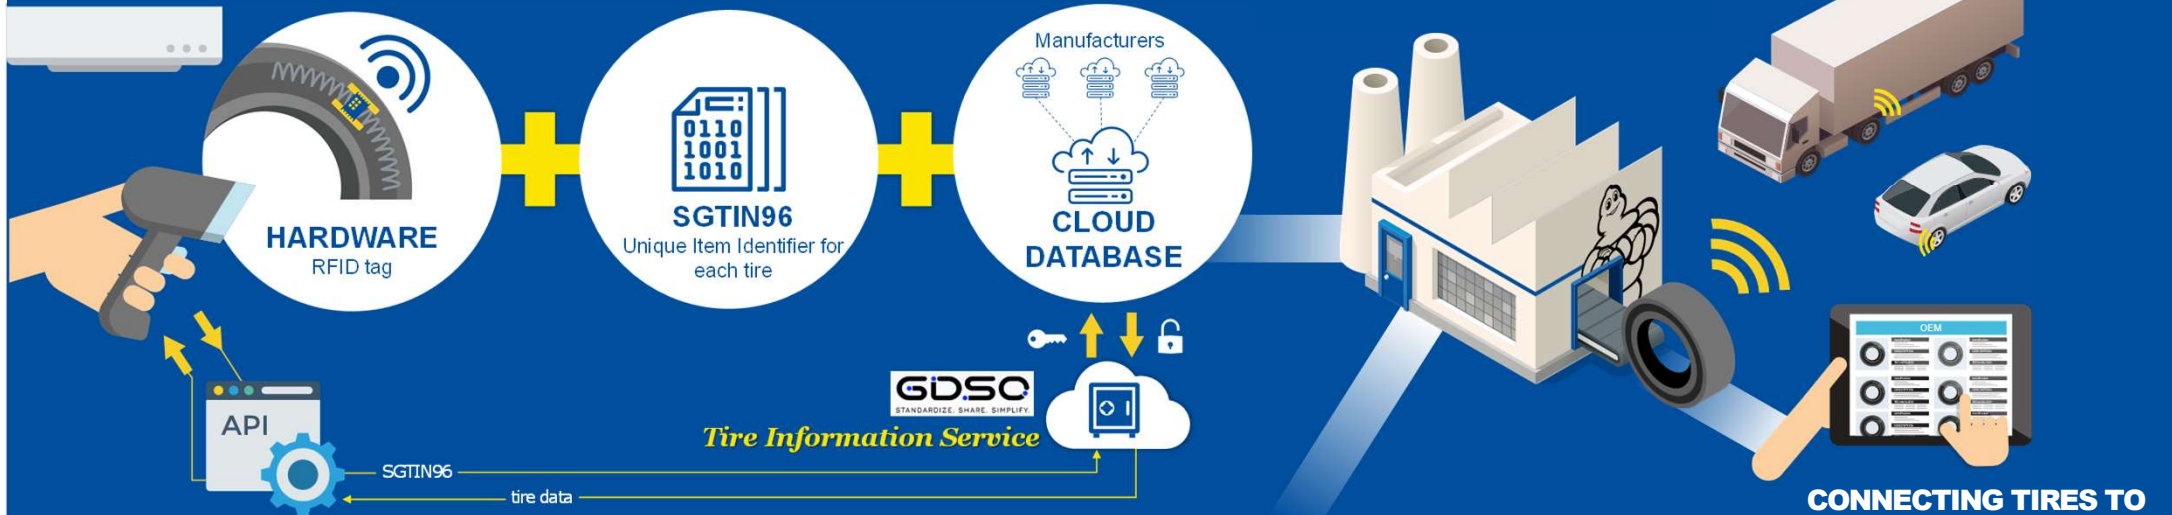

CAN BE READ WHILE MOVING / ROLLING

UNIQUE ID

SECURE & NORMED

FOUNDATION TO

ASSOCIATE TIRE DATA

MICHELIN IS WILLING TO FOSTER DIGITALIZATION OF THE TIRE INDUSTRY AND MARKET ADOPTION OF RFID AS A STANDARD

COPYRIGHT MICHELIN

IS LAUNCHED UNLOCKING POTENTIALS TO LEVERAGE AND EXCHANGE DATA

OBJECTIVES: STANDARDIZE TIRE DATA AND MANAGE THE SERVICE TO RETRIEVE DATA FROM SEVERAL TIRE MANUFACTURERS BASED ON A UNIQUE ITEM IDENTIFIER (SGTIN96)

The screenshot shows the GDSO Tire Information Service interface. The search results for a Michelin tire are displayed, including technical specifications and product IDs.

Technical specifications	
Brandname	MICHELIN
Commercial long description	235/35 ZR19 (91Y) EXTRA LOAD TL PILOT SPORT 4 S MI
Tireline	PILOT SPORT 4 S
Tire size	235/35R19
Load index	91
Speed symbol	Y
Extra-load	true
Directional	false
Asymetrical	true

Product IDs	
Manufacturer code	0762575
European Article Number (EAN)	3528707625755

Markings	
3PMSF	false
M+S	false
OEM Tire Marking	
OEM Name	

Tire information	
TIN	6U 17 029X 3921
Country of origin	FRA

IN THE MEANTIME REGOM HAS DEVELOPED A VISION AI ANALYSIS SYSTEM TO START IMPROVING ELT SORTING

ACTIVITIES

- Design, manufacturing, and sale of sorting machines for ELT and linked software
- R&D of tire reuse solutions
- Promotion for reusable tires

OBJECTIVES

- Improve sorters' working conditions
- Refine & optimize valorization
- Adapt to tomorrow's market

5 years of R&D

+1.5M tires tested

Algorithm 100% internally developed

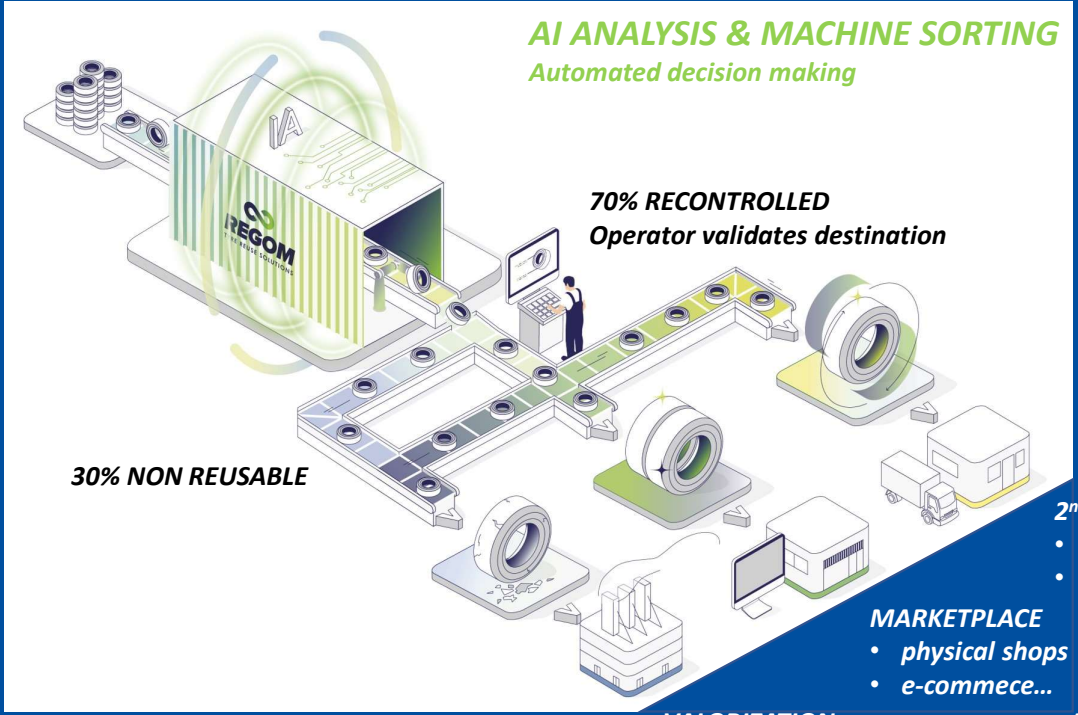

- ✓ *industrial speed rate: 1 tire every 3s*
- ✓ *800 tires analyzed per hour*

A.I. decision-making based on analysis and recognition of :

- ✓ *brand*
- ✓ *profile*
- ✓ *dimension*
- ✓ *remaining tread depth*

SORT YOUR TIRES TO MATCH THE RIGHT VALORIZATION OUTPUTS

- Reuse
 - ✓ online and offline sales
 - ✓ norms labels, quality controls
- Retreading
 - ✓ specific brands,
 - ✓ low remaining tread depth
- Material recovery
 - ✓ after shredding and granulation
- Pyrolysis
- Micronization
- Devulcanization

RFID POC LAUNCHED ON TC58 ELT SORTING LINE

- RFID gate installed in November 2022 in addition to current REGOM AI analysis / sorting machine on conveyor
- Demonstrate RFID system capabilities on an ELT sorting line
 - ✓ environment integration
 - ✓ tire diversity: already > 80 MICHELIN references & 10 competitors' ones
 - ✓ real time connection
 - ✓ ...

CONCLUSIONS

Tire identification enables to optimize ELT sorting and improve value

REGOM solution based on vision AI analysis system already enables to automatize pre-sorting

Deployment of RFID tags in tires and RFID systems by ELT collectors will further unlock sorting potentials and support the development of new material recovery streams

Access to data linked to materials will certainly require an independent governance

A regulatory framework could ease the adoption within the tire recycling industry
